

George-Gabriel Bădescu

I am a second year student in Computer Science, passionate about informatics and I am eager to deepen my knowledge. As a hard-working and ambitious person, I am willing to improve, gather experience and apply my skills gained during my studies.

Education

Bachelor Degree in Computer Science / [University of Bucharest, Faculty of Mathematics and Computer Science](#)

Since October 2019

Mathematics and informatics / [Zinca Golescu National College](#) Pitești, Romania

From November 2015 to June 2019

Baccalaureate Grade: 9.75/10

Programming languages

Good knowledge of : C/C++, C#, Python, ASP .NET MVC5, HTML, CSS, PL/SQL;

Basic knowledge of : Java, JavaScript, Haskell, R

Projects

Sweets Shop

- Web application for online shopping using ASP.NET MVC5 with entity framework.

Salon management database

- Designed a database that contains information about employees, clients, fidelity cards, products, and appointments. I used PL/SQL procedures, functions and triggers for manipulation of data.

Mini Shell

- Using C language that implements the basic instructions found in any command line: history, pipes, logical expressions, program suspension.

Warriors Gym

- A small website for a gym during Web Technologies course using HTML, CSS, JavaScript and NodeJS.

Benford's law

- A web application for demonstration of Benford's Law using R Shiny package and ggplot for graphics.

Login and register system

- Developed for phones using python with Kivy framework. Users can create accounts with email confirmation and request the change of password. The accounts are stored using SQLite.

Awards

Certificate of Course Completion Databases Foundation Oracle
